>>TECHNICAL DATA & FEATURES

- Great for finding imperfections during the sanding process
- 1 light dust coat is all you need
- Fast drying
- Fast sand times
- Doesn't load paper once dry
- Easy sanding

>>APPLICATION:

- Blow off the surface to remove any dust or sanding residue.
- Shake can for 2 minutes after mixing ball moves freely.
- Apply 1 light dust coat to the repair area to be sanded.
- Allow to dry. GC2 Guide Coat is ready to sand within 3-5* minutes.
- Proceed to sanding. Repeat if necessary.

*Dry/Sand times depend on temperature, air flow and humidity and wetness of coating sprayed. If dusted, coating will dry to sand in 3-5 min.

Note: To avoid plugging of tip - Invert can after use and spray to clear tip.
